

Strategic Logistics & Corporate Tariff Proposal

Subject: Exclusive Courier Partnership, Tiered Corporate Rates & Accelerated COD Settlement

1. EXECUTIVE SUMMARY

Fayzee (fayzee.store) is a fast-growing digital e-commerce marketplace empowering manufacturers, wholesalers, and independent retail brands across Pakistan. Unlike single-merchant accounts, Fayzee operates on a centralized **marketplace aggregator model**, routing fulfillment orders from dozens of verified online merchants through our core platform.

To ensure superior logistics efficiency, Fayzee has **fully integrated Trax API (sonic.pk) natively** into our seller portal. Every registered seller on Fayzee is automatically provisioned to dispatch customer orders through Trax with 1-click doorstep pickup and real-time tracking. This document proposes a formal **Tiered Corporate Partnership** to establish Trax as Fayzee's preferred logistics carrier.

2. COMPLETED TECHNICAL INTEGRATION (LIVE ON PRODUCTION)

Module Integrated	Deployment Status	Commercial Benefit to Trax
Automated Doorstep Pickup	Active & Live	Riders automatically dispatched directly to seller shops/residences across Pakistan.
Dynamic 3,800+ City Mapping	Active & Live	Live city resolution eliminating invalid consignment delivery rejections.
1-Click Instant Consignment (CN)	Active & Live	Immediate barcode generation and paperless booking directly into Trax servers.
Native Real-time Order Tracking	Active & Live	Customers and merchants monitor parcel status directly inside Fayzee.

Commercial Implication: Because Trax is natively pre-selected as the primary logistics provider on Fayzee, **every merchant onboarding onto our platform automatically routes their daily shipping volume to Trax** without Trax having to spend individual customer acquisition cost (CAC).

3. PROJECTED VOLUME ROADMAP (PHASED GROWTH)

Fayzee is actively rolling out seller onboarding campaigns across key commercial hubs (Peshawar, Lahore, Karachi, Rawalpindi/Islamabad, Faisalabad). Projected order volume is segmented as follows:

Phase	Active Sellers	Projected Monthly Parcels	Projected Monthly COD Value
Phase 1 (Pilot Launch)	50 – 150 Sellers	1,500 – 3,500 Parcels	PKR 4,500,000 – 10,500,000
Phase 2 (Growth & Scale)	150 – 500 Sellers	5,000 – 15,000 Parcels	PKR 15,000,000 – 45,000,000
Phase 3 (Enterprise)	500+ Sellers	25,000+ Parcels	PKR 75,000,000+

4. PROPOSED COMMERCIAL TERMS & STRATEGIC ASKS

To incentivize sustained seller growth and guarantee platform exclusivity, we propose the following commercial framework:

💰 4.1. Tiered Delivery Tariff

Phase 1 Tariff: PKR 160 – 170 (0.5 KG) / PKR 190 – 200 (1.0 KG).
Growth Tier (5k+): Automatically reduces to PKR 140 (0.5 KG) upon meeting milestone volume.

⚡ 4.2. Accelerated COD Cycle (T+2)

Automated settlement within **48 hours (T+2)** of parcel delivery to maintain seamless merchant payout liquidity on Fayzee.

📦 4.3. Reduced COD Fee (1.5% – 2.0%)

Reduction from standard 3.5% down to **1.5% – 2.0%**, recognizing our centralized billing and zero individual acquisition cost for Trax.

💬 4.4. Dedicated Account Manager (KAM)

Direct priority WhatsApp support channel for immediate rider coordination, daily pickups, and customer SLA escalations.

5. STRATEGIC VALUE PROPOSITION FOR TRAX LOGISTICS

- Zero Customer Acquisition Cost (CAC):** Trax secures dozens to hundreds of active e-commerce brands with zero marketing expense.
- Predictable Recurring Volume:** All orders flow through one centralized, audited API pipeline with zero manual invoicing overhead.
- Long-term Platform Stickiness:** Once merchants integrate their workflows into Fayzee's Trax fulfillment pipeline, switching barriers ensure lifelong customer retention.
